

Ren Honglin

Professor

Email : renhl@jlu.edu.cn

SHORT BIOGRAPHY:

Ren Hong-Lin obtained his PhD. Sc. in Environment Science from Xiamen University in 2008. He then had worked as an associate Professor for five years. In 2011, he went to City University of Hong Kong as a postdoctoral fellow, and then to University of Michigan as a visiting scholar in 2012. From 2013, he worked in the Institute of Zoonosis as a professor, focusing on Zoonosis and Veterinary Public Health. He friendly received students to study and work hard in his research group for their master or doctoral degrees from Jilin University.

RESEARCH INTERESTS :

- Pathogenic mechanism and detection of *Brucella* spp.
- Animal-derived Food safety
- Zoonosis
- Veterinary public health

SELECTED PUBLICATIONS :

- Characterization of a Novel Interleukin-1 Receptor Antagonist from Sheep (*Ovis aries*). *J Interferon Cytokine Res.* 2020,40(5):268-278. (2019 IF: 2.032)
- Host Prdx6 contributing to the intracellular survival of *Brucella suis* S2 strain. *BMC Veterinary Research.* 2019.15:304. (IF: 1.835)
- Molecular characterization and differential expression analysis of interleukin 1 β from *Ovis aries*. *Microb Pathog.* 2018.116:180–188. (IF: 2.581)
- Full-Length cDNA Cloning, Molecular Characterization and Differential Expression Analysis of Lysophospholipase I from *Ovis aries*. *Int J Mol Sci,* 2016, 17(8):1206. (IF: 3.226)
- Characterization of surface antigen protein 1 (SurA1) from *Acinetobacter baumannii* and its role in virulence and fitness. *Vet Microbiol,* 2016,186:126-138. (IF: 2.628)

AWARDS:

- Award for scientific and technological advancement of Jilin University (the second class)
